

Jaibir Singh

Forward Deployed AI Engineer | Senior Technical Specialist

Ghaziabad, Uttar Pradesh, India | contact2jaibir@gmail.com | +91-9999XXXXXX | jbr2021.github.io | github.com/jbr2021

PROFESSIONAL SUMMARY

Senior Technical Specialist and Forward Deployed AI Engineer with 15+ years of experience delivering enterprise web, cloud, and AI solutions. Specializes in Agentic AI, AI Agents, LangGraph/StateGraph, Azure OpenAI, RAG, document intelligence, and cloud-native integration. Experienced in translating complex operational requirements into production-ready applications.

CORE EXPERTISE

- Agentic AI & AI Agents: LangGraph, StateGraph, tool routing, multi-step workflows
- Enterprise RAG: Azure AI Search, SharePoint, vector retrieval, grounded responses
- GenAI & Document Intelligence: Azure OpenAI, document validation, summaries, tracked-change reports
- Cloud & Delivery: Azure Web Apps, Functions, Blob Storage, API Management, Docker, Kubernetes
- Engineering: Python, FastAPI, Angular, .NET, React, MS SQL, PostgreSQL

PROFESSIONAL EXPERIENCE

HCL Technologies | Senior Technical Specialist

Jan 2026 — Present

Sector 126, Noida, Uttar Pradesh, India

Leading AI engineering and cloud architecture initiatives for enterprise clients, with a focus on deployable AI Agent, Agentic AI, and RAG solutions.

Review Agent

AI Agent-powered document review agent that validates up to 15 uploaded documents (20 MB each), including two required Word primary documents. Configurable rules are evaluated per primary document with live, rule-by-rule Pass/Fail results, concise summaries, and a Word report with tracked changes.

Tech: Angular, Python, MS SQL, Azure Blob Storage, Azure OpenAI, Azure Web Apps, Azure Document Intelligence, RAG, GenAI, AI Agent, Chatbot

Supplier Chatbot

Agentic AI-powered supplier support chatbot that helps suppliers understand bank policies for supplies and tenders. LangGraph intelligently routes queries to Azure AI Search to retrieve relevant, grounded guidance.

Tech: Angular, Python, SharePoint, Azure AI Search, Azure Blob Storage, Azure OpenAI, Azure Web Apps, PostgreSQL, LangGraph, Agentic AI

Implementation Status and Results Reports (ISR)

AI Agent-based project built with LangGraph/StateGraph and a simple node workflow to monitor, track, and analyze issues across international projects, enabling more effective management and resolution strategies.

Tech: LangGraph, StateGraph, Databricks, Blob Storage, MS SQL Server, Python FastAPI, Angular, Timer-triggered Azure Functions, Azure OpenAI GPT-5, Aspose library

HCL Technologies | Technical Specialist

Sep 2021 — Dec 2025

Sector 126, Noida, Uttar Pradesh, India

Delivered AI engineering and cloud architecture initiatives for premier international clients including the World Bank Group and ANZ Bank.

Project Approval Document (PAD)

Generate a structured 15-section approval document using AI-powered content generation. Each section is created from user prompts, automatically compiled into a single document with an indexed table of contents, and made available for download.

Tech: Azure OpenAI (gpt-5), .NET Core, Python FastAPI, Aspose, Blob Storage, NumPy, MS SQL Server, Azure Search Index, AWS Open Search

Document Review Tool (DRT)

A compliance-focused application to review uploaded documents (Word, PDF, PPT). It detects and highlights sensitive words, provides recommendations for better alternatives, adds explanatory notes, and generates a summary of sensitive words used. It also presents a tabular report of sensitive keywords with corresponding page numbers.

Tech: Angular, .NET Core, Azure Service Bus, Azure Functions, Blob Storage, MS SQL Server (C#), Azure OpenAI GPT-5, Aspose library

Customize Microsoft App

Microsoft integration application that surfaces Planner, Lists, and Teams information and enables users to create or clone existing Planner and List items through Microsoft Graph APIs.

Tech: Angular, .NET, Azure Web Apps, Microsoft Graph APIs

GetOn Infotech Pvt. Ltd. | Development Head

Apr 2017 — Aug 2021

Connaught Place, New Delhi, India

Led end-to-end application delivery across Azure DevOps deployments, automation workflows, and business-critical accounting and production systems.

ABL Online | Team Lead

Apr 2014 — Apr 2017

Connaught Place, New Delhi, India

Architected transactional applications for invoicing, GST taxation, payroll, CRM, HRM, and cloud-based business operations.

ABL Online | Web Developer

Jun 2011 — Apr 2014

Connaught Place, New Delhi, India

Developed web applications including property and job portals, CRM/HRM systems, and virtual-number solutions.

SELECTED EARLIER EXPERIENCE

IBM Daksh | Customer Care Executive | Apr 2010 — Apr 2011

Gurgaon, Haryana, India | Supported healthcare backend operations using MS-DOS-based software.

EDUCATION & CERTIFICATION

Professional Cloud Developer (English) | Google Cloud Platform

Issued 1 Aug 2022 | Certification ID: aeaduY

GNIT (Software Engineer Course) | NIIT, South Ex Campus, Delhi | 2006 — 2009**Bachelor of Commerce (BCom) | Delhi Open University | 2005 — 2008**
